THE LUGISLATURE AND ITS CRITICS

An Austin dispatch to The News says:
"Mr. Blair is not weided to the redistricting idea, and other members are resisting it with all their force. The impression is that no such legislation will be enacted. The house even refused this afternoon to excuse the joint committee for work on the bill."

What about this? Not less than a dozen districts can be abolished without detriment to the public welfare. Reduce the number of districts, equalize the work and keep the judges busy. The fifth plank of the Fort Worth platform demands the reapportionment of the judical districts. What is Culberson going to do about it? apportionment of the judical districts. What is Culberton going to do about 11.7 If a judicial reapportionment and a reform for bill fail in this legislature, the administration will have failed to keep two of its most solern pieckes to the people. And, to tell the truth about it, the News has move suspected the present regime of the slightest intention of keeping these pieckes in good faith. Talk about reduction of emoluments and the about reduction of offices by the hungry politicians of this State'-Galveston News.

Since it seems established that an epidemic, mild but still pronounced, of grip is again upon us, it may be of value to repeat the French method of checking a cold with cologne, which two or three year ago was rather generally exploited. On the appearance of the first symptoms of the cold some good cologne should be poure bandkerchief and freely inhaled on a handkerchief and freely inhaled through nose or mouth, according as one seeks to control a head or chest cold, several times a day. The best of effects are necured when the upper throat is affected rather than the masal membrane. In twenty-four hours, according to the French physician who advocates the treatment, actorishing results have been achieved. The superficial inflammation is relieved and the apread of the cold prevented.
